COMMUNITY OF THE YEAR

ICF GLOBAL SUMMIT 2019
New York June 11-13

Global Network

Of cities, metro areas and counties recognized as Intelligent Communities, collaborating on economic and social development

Think Tank

Studying how Intelligent Communities use ICT to build economic prosperity, solve social challenges and enrich their cultures

160 cities, metro
areas and counties
5 continents
Populations from
10,000 to 12 million

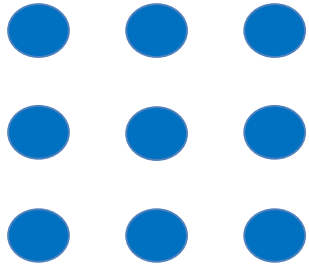

A Practical Approach

Our suggested starting point for communities is a workshop that does three things only:

- Provides the context and need for the infrastructure

- Provides real examples of its use (to encourage some creativity)

- Asks every group (or person) to identify a way that the community can get value from the infrastructure in the next 3-6 months – and then make them responsible for delivering on that potential

Why We Need Broadband Infrastructure

We Are Only In The Early Stages Of The Internet's Development

Not yet today, but by 2030 — A world of high quality visual communication and easy collaboration everywhere, enabling anyone anywhere to virtually meet anyone else anywhere else

Infrastructure Needs To Support High Quality Visual Communications Everywhere

We process visual information 60,000 times faster than text

Only 7% of communication is about the text

38% is in the way that words are said and 55% is in facial expressions

Visual communication is especially critical in establishing trust between people

Mix And Match Purposes

The most successful broadband projects have usually combined more than one purpose

- High speed communications

- Healthcare

- Education and libraries

- Business development

- Smart grid and management of other infrastructure

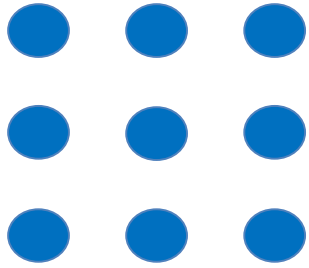

- IP-based telephony

- Etc.

This combination opens up more sources of funds

This combination means more people have a reason to use the broadband

The Economic Benefits Of Broadband Infrastructure

One Hundred Year Shift In The USA

Thousands of employees and percent of total

	Employment 1900	Employment 2000	Percent 1900	Percent 2000
Agriculture	11,680	3,281	43.5	2.4
Goods	7,252	25,710	27.0	18.8
Services	6,832	85,370	25.4	62.5
Government	1,094	22,131	4.1	16.2
Total	26,858	136,492	100.0	100.0

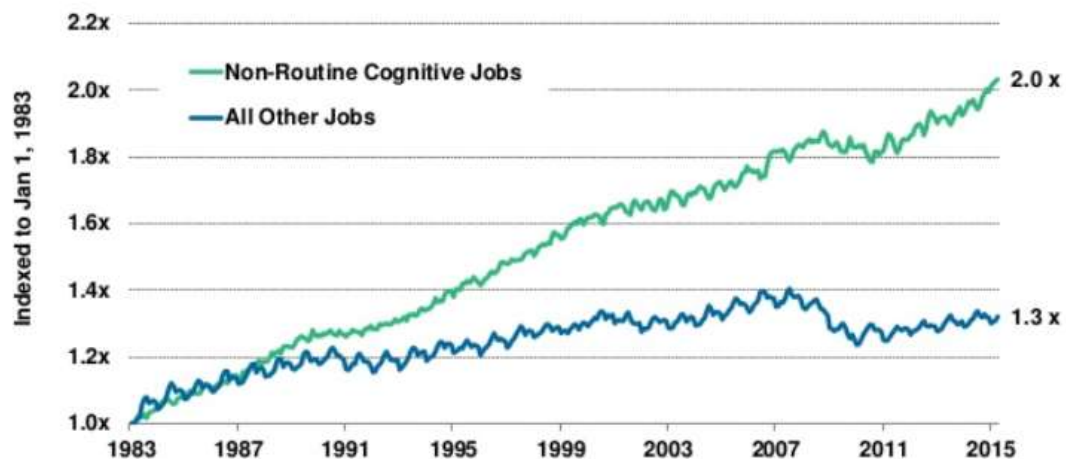

The Rise Of The Knowledge Economy

High-Skilled / Knowledge-Based Jobs Grew 2x Since 1983...
While Other Jobs Grew Just 1.3x

Non-Routine Cognitive Jobs = High-Skilled and Requires Flexibility, Creativity, Problem Solving

Non-Routine Cognitive Jobs vs. All Other Jobs Growth,
USA, 1983 – 2015 (Indexed to Jan 1, 1983)

Source: US Census Bureau, Federal Reserve Bank of St. Louis, 4/15. Based on methods from Jaimovich and Siu, 2012; Stephen Roach, Senior Fellow and Economist at Yale University, 2015.
Note: Non-routine cognitive jobs include jobs like computer and mathematical, architecture and engineering, education and training, and healthcare occupations.
All other jobs (referred to as routine cognitive and manual occupations) include jobs like production, construction, administrative, and various other occupations.

Rise of the Knowledge Worker

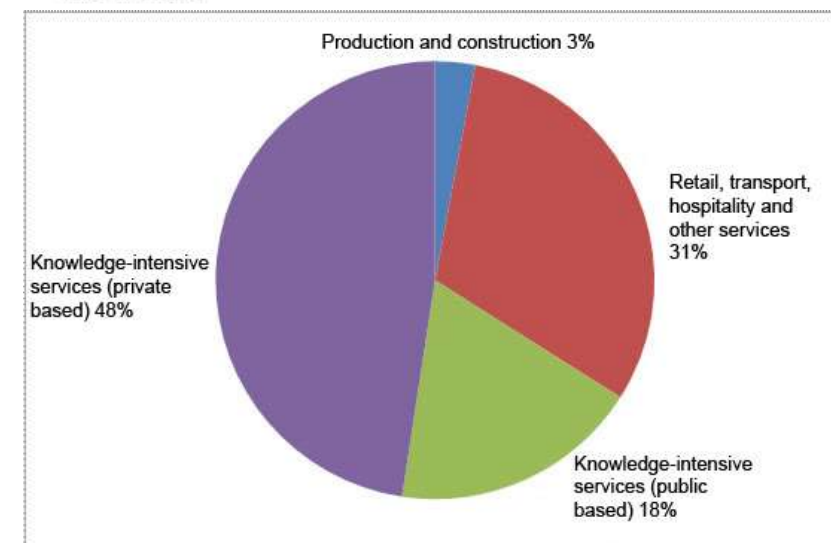

The Rise of the Knowledge Worker

Workers are classified by whether their occupation is primarily cognitive or manual work, and whether or not the tasks are routine. Knowledge work is nonroutine cognitive work.

#FutureOfWork

- Well over 60 million knowledge workers in the U.S. alone.
- You work with and employ knowledge workers.
- You are a knowledge worker.

The Rise Of Independent Workers

These Trends Present A Key Question For Economic Strategy In Future Decades

When most people can work anywhere, where will they choose to live & work?

Broadband Has Had A Big Economic Impact

For every one percentage point increase in broadband penetration in a state, employment is projected to increase by 0.2 to 0.3 percent per year.

— Brookings Institution

“The increase in local GDP is more than ten-fold the value of the investments in broadband infrastructure. “

— SNG

The Benefits of Broadband

From: [Department for Culture, Media & Sport](#)
Part of: [Broadband investment](#)
First published: 14 November 2013

For every £1 the government is investing in broadband, the UK economy will benefit by £20, an [expert report](#) published today reveals.

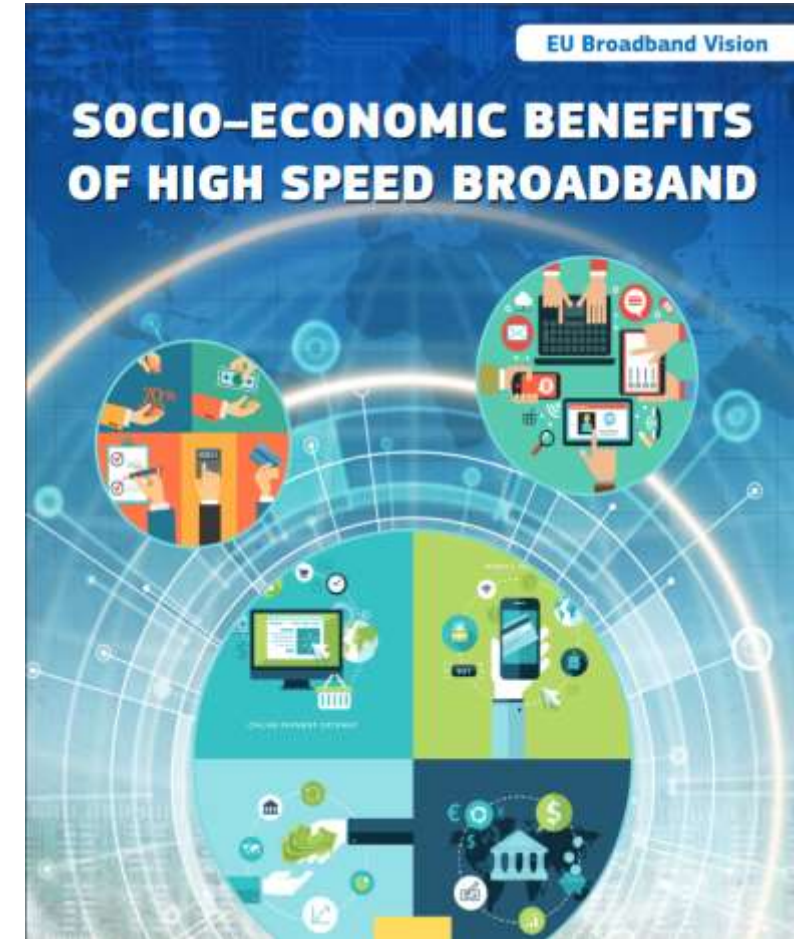

The Impact Is Not All Being Measured

“The traditional investment model implicit in the current regulatory framework is not necessarily in line with the interest of society.”

“A key underpinning argument is that not all benefits of high-speed broadband can be monetised and that passive broadband infrastructure can be seen as a public good and often meets natural monopoly conditions outside urban areas.”

“Results of recent studies show a positive effect of high-speed broadband on GDP, employment, consumers, businesses and many more. The socio-economic impact of high speed broadband is big, and will most likely be even bigger than estimated ... [with] indirect and induced benefits such as e-government, e-health and e-education”

PLANNING YOUR NEW FALL COSTUME?

Made-to-Order Suits require preliminary preparation. Those who are planning their new will find in this opportune showing a most comprehensive variety of materials. Weaves that are to be in favor this coming season; qualities that insure excellent wear, are the kind offered for your selection.

COME TOMORROW.

48 in. BLACK BROADCLOTH. Fashion has decreed that this durable fabric shall again be popular for fall and winter wear. This quality is made to give excellent service, has a beautiful, rich finish, and priced at a yard... **\$1.25**

34 in. in Black and Navy at... **\$2.00**

40-in PREMIER CLOTH, a Yd. **\$1.25**

A non-irresistible, all wool material for Women's and Misses Dresses, Waists, etc. Has a permanent lustrous finish, and is of medium weight, shown in a range of the most wanted colors.

30 and 34-in. PLAID CHEVIOTS. Splendid plaids and beautiful Roman stripes, such as these, are to be in vogue this fall for separate skirts and coats.

36-in. CREPE POPLIN, a Yard **\$1.00**

A beautiful, crepe fabric that lends itself admirably in the new season's popular fashions. Is especially desirable for Ladies' Suits. Shown in Olive Green, Navy, Brown, Copenhagen, Belgian Blue, and slate Grey. 34-in. At a Yard **\$1.00**

40-in PLAID SUITINGS, Yard **75c**

Rich and beautiful like those plaids in fall garter combinations. Are quite suitable for Girls' and Misses' School Dresses. Are partly wool and of good weight.

48-in ALL WOOL SERGE, a Yd. **\$1.00**

Serge will be prominent in the coming fall and winter costumes. The line shown at **\$1.00** a yard is of an especially

ABDICATION OF THE GREEK KING

Crown Prince George to Succeed Him, and Venizelos Will Return to Power.

RUSSIANS CAPTURE 15,790 MEN.

London, Sept. 1.—The abdication of King Constantine of Greece is reported by an official dispatch from the British press representative at Salonika, who adds the king has abdicated in favor of Crown Prince George, and that former Premier Venizelos, leader of the party which favors intervention in the war by Greece with the Entente Allies, will be the power behind the throne. The correspondent regards it as uncertain whether the Entente Allies wish the assistance of Greece in the war.

The surrender of three Greek garrisons in Macedonia to a committee, the nature of which is not clearly indicated, is reported from Salonika. Another dispatch says there has been fighting between the Greek regulars and volunteers organized to resist the Bulgarian invasion. French troops are reported to have intervened to prevent serious disturbances in the Salonika region, where the existence of internal disorders, if not rebellion, is indicated.

The Hellenic invasion of Hungary apparently is continuing without serious interruption. Official announcement is made at Bucharest that the important industrial center of Petrovarin in the rich coal fields of Southern Transylvania and Targovis-Vale have been occupied by Hungarians.

MAY RESCIND STRIKE ORDERS

Congress Expected to Pass Laws Satisfactory to R. R. Brotherhoods.

BILL WILL PROVIDE FOR 8-HOUR DAY

Washington, D. C., Sept. 1.—Measures which will result in rescinding orders for a railway strike next Monday may be passed by the House and Senate under special rule today, and within 24 hours may be on their way to require President Wilson's signature.

Both Houses had under consideration virtually identical bills establishing an eight-hour day for trainmen in interstate rail way commerce and providing for creation of a Commission to study the effect, and President Wilson was on hand to press for their immediate passage. He set aside the morning for a personal visit to the Capitol to force the Administration's influence in behalf of his proposals.

Some opposition was looked for, particularly in the House, but it was believed by Congressional leaders this would be overcome to prevent passage. In the Senate there was pronounced feeling that the entire program proposed originally by the President should receive immediate consideration.

The House was to meet at 11 o'clock and vote finally on the Adamson bill—introduced yesterday with approval of the Administration—at 4:30 this afternoon. The Senate was to convene at 10 o'clock, to take up the bill on which the Interstate Com-

FIRE DESTROYS CELLULOID WORKS

Spectacular Blaze at Riverdale Avenue and Downing Street Yesterday Afternoon.

THE LOSS IS ESTIMATED AT \$50,000

Works Owned by the Schneider Manufacturing Company—Jefferson DeAngelo Owns the Building—Firemen Save Other Structures in the Neighborhood.

Starting in a small piece of celluloid on the second floor and spreading rapidly in sheets of that material, fire destroyed the plant of the Schneider Manufacturing Company, 908 Riverdale avenue, at the north-west corner of Downing street, yesterday afternoon. The brick building, which is owned by Jefferson DeAngelo, was gutted. The total loss is heavy.

For a time the fire threatened to destroy several frame apartment houses in Riverdale avenue and in Downing street. One of the buildings, a four-story frame structure occupied by eight families, and situated a few feet west of the manufacturing plant, was badly damaged. This structure is owned by Henry Meier.

Frame buildings on the east side of Riverdale avenue, owned by James W. Hennessey and Henry Schultz, and one on the west side of that thoroughfare, owned by a Mrs. Wheeler, and located a short distance south from Downing street, were scorched by heat from the burning structure.

The Schneider Company manufactures various articles of celluloid, such as toilet

Enable People To Interact With And Create Their Own Experience

Bring The World To Small Town Shopping

Main Street stores can bring the world's wares into the store, virtually, without driving up inventory costs

Key Take-Aways

1. There isn't only one way to deploy broadband or to operate it.
2. Broadband infrastructure is necessary for residents to achieve their full potential in this century's global knowledge economy
3. Digital technology infrastructure can be blended with the physical aspects of a city to create new and delightful destinations that residents will appreciate and will attract visitors.

Why Think About The Future Today?

“A good hockey player plays where the puck is ... a great player plays where the puck will be.” — Wayne Gretzky

“If the rate of change on the outside exceeds the rate of change on the inside, the end is near.” — Jack Welch, former CEO, General Electric
