Industry Performance, 2010-2017

Unemployment

US Bureau of Labor Statistics

Tightening Labor Market

Unemployment by Industry, BLS

Eds & Meds = Diversity?

TOP AND BOTTOM 10 DIVERSE METROS

MANUFACTURING IS NOT DEAD

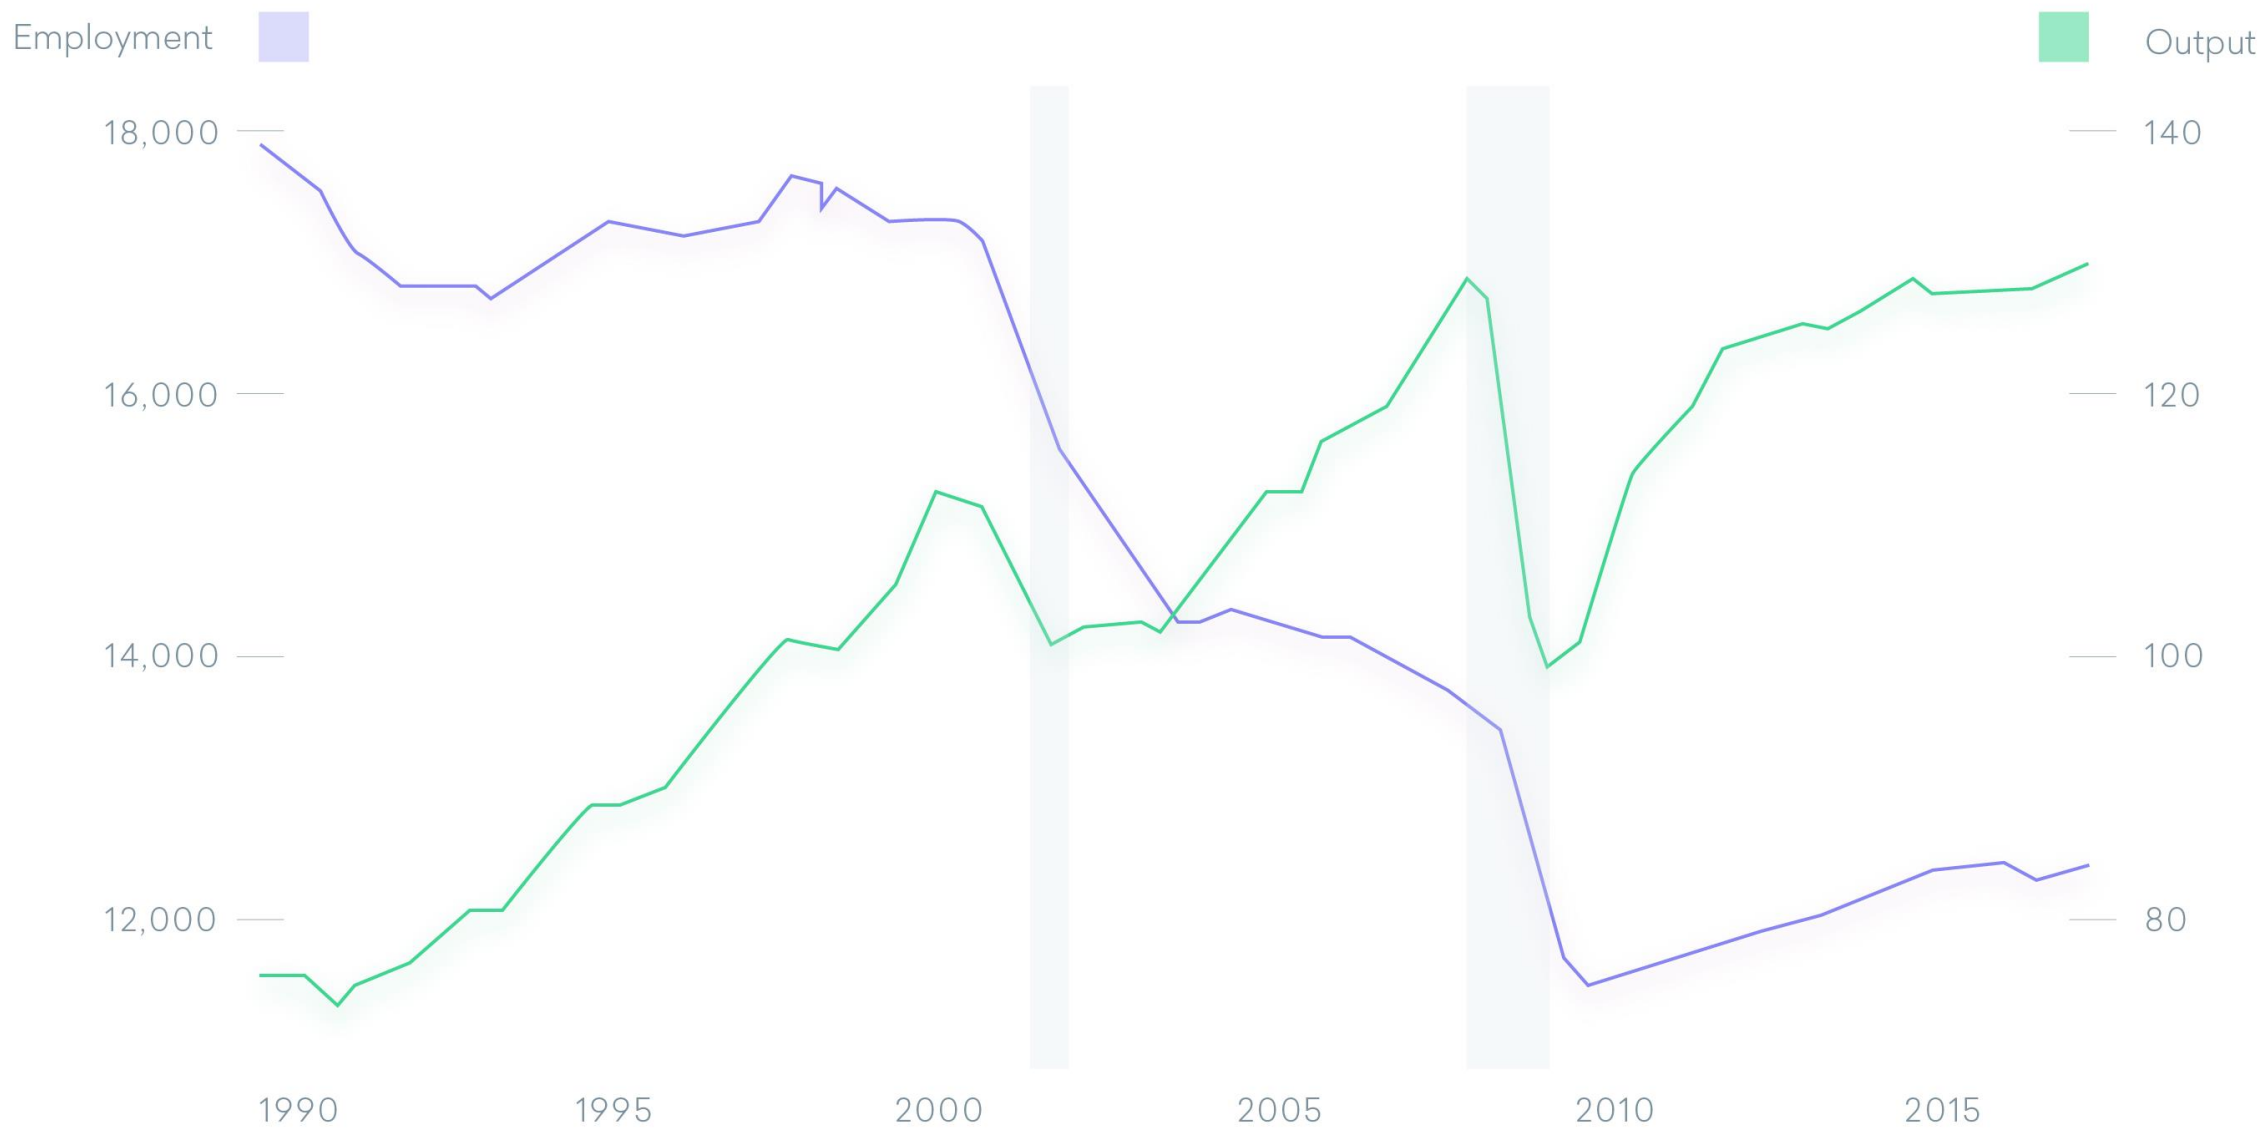

The Rise of High Skill, High-Wage Production Jobs

Methodology

- **Demand** - Used **industry and occupation** data to analyze overall performance
- **Skill Clusters** - Evaluated **400K postings** for 2017 to determine the **skills** employers need
- **Wages** - **Analyzed compensation data** collected from traditional sources, job postings, and resumes/online profiles to determine whether these skills lead to increased wages
- **Transition** - Used postings and profiles to trace how the **skills** manifest

Author's estimate of CES (1990-2017). Shaded areas represent US recession as reported by NBER. Real output is from US BLS.

Job Openings

Analysis of Job Openings from JOLTS, 2007-2017

Job Postings

Emsi Job Posting Analytics, 2014-2017

Demographics

(Half of all workers are above 45)

Student Kalei Kipp in Cedar Crest High School's welding program in Lebanon, Pennsylvania, during the 2016-2017 school year. Three percent of welders in the U.S. are women. Photo from PBS NewsHour's Student Reporting Labs series "Outside the Box."

After decades of pushing bachelor's degrees, U.S. needs more tradespeople

U.S. Manufacturing Landscape

- 30 year decline
- Re-emergence since 2010
 - 800,000+ new jobs
 - 350% increase in openings
 - 2.6% unemployment
 - Postings rivaling IT and health care
- Lack of supply/massive shortages

UNITED STATES, 2017

Top Companies Advertising for Production Workers

Top Companies Posting

- **Aerospace and defense product manufacturers** (Lockheed Martin, United Technologies, Raytheon, Northrop Grumman)
- **Auto manufacturing and parts** (General Motors, Tesla, Johnson Controls)
- **Building and construction materials** (Oldcastle, Mohawk)
- **Consumer goods** (Ashley Furniture, Honeywell, Corning)
- **Health care and biotech** (Siemens, Thermo Fisher Scientific)

What do jobs look like today?

- Skills and transferability
- Compensation
- Do skills differ between locations?
 - Nationally
 - Michigan
 - Texas
 - California

National Cluster

- **Traditional**

- Welding, machining, etc.

- **Computer-Automated Tech (CAT)**

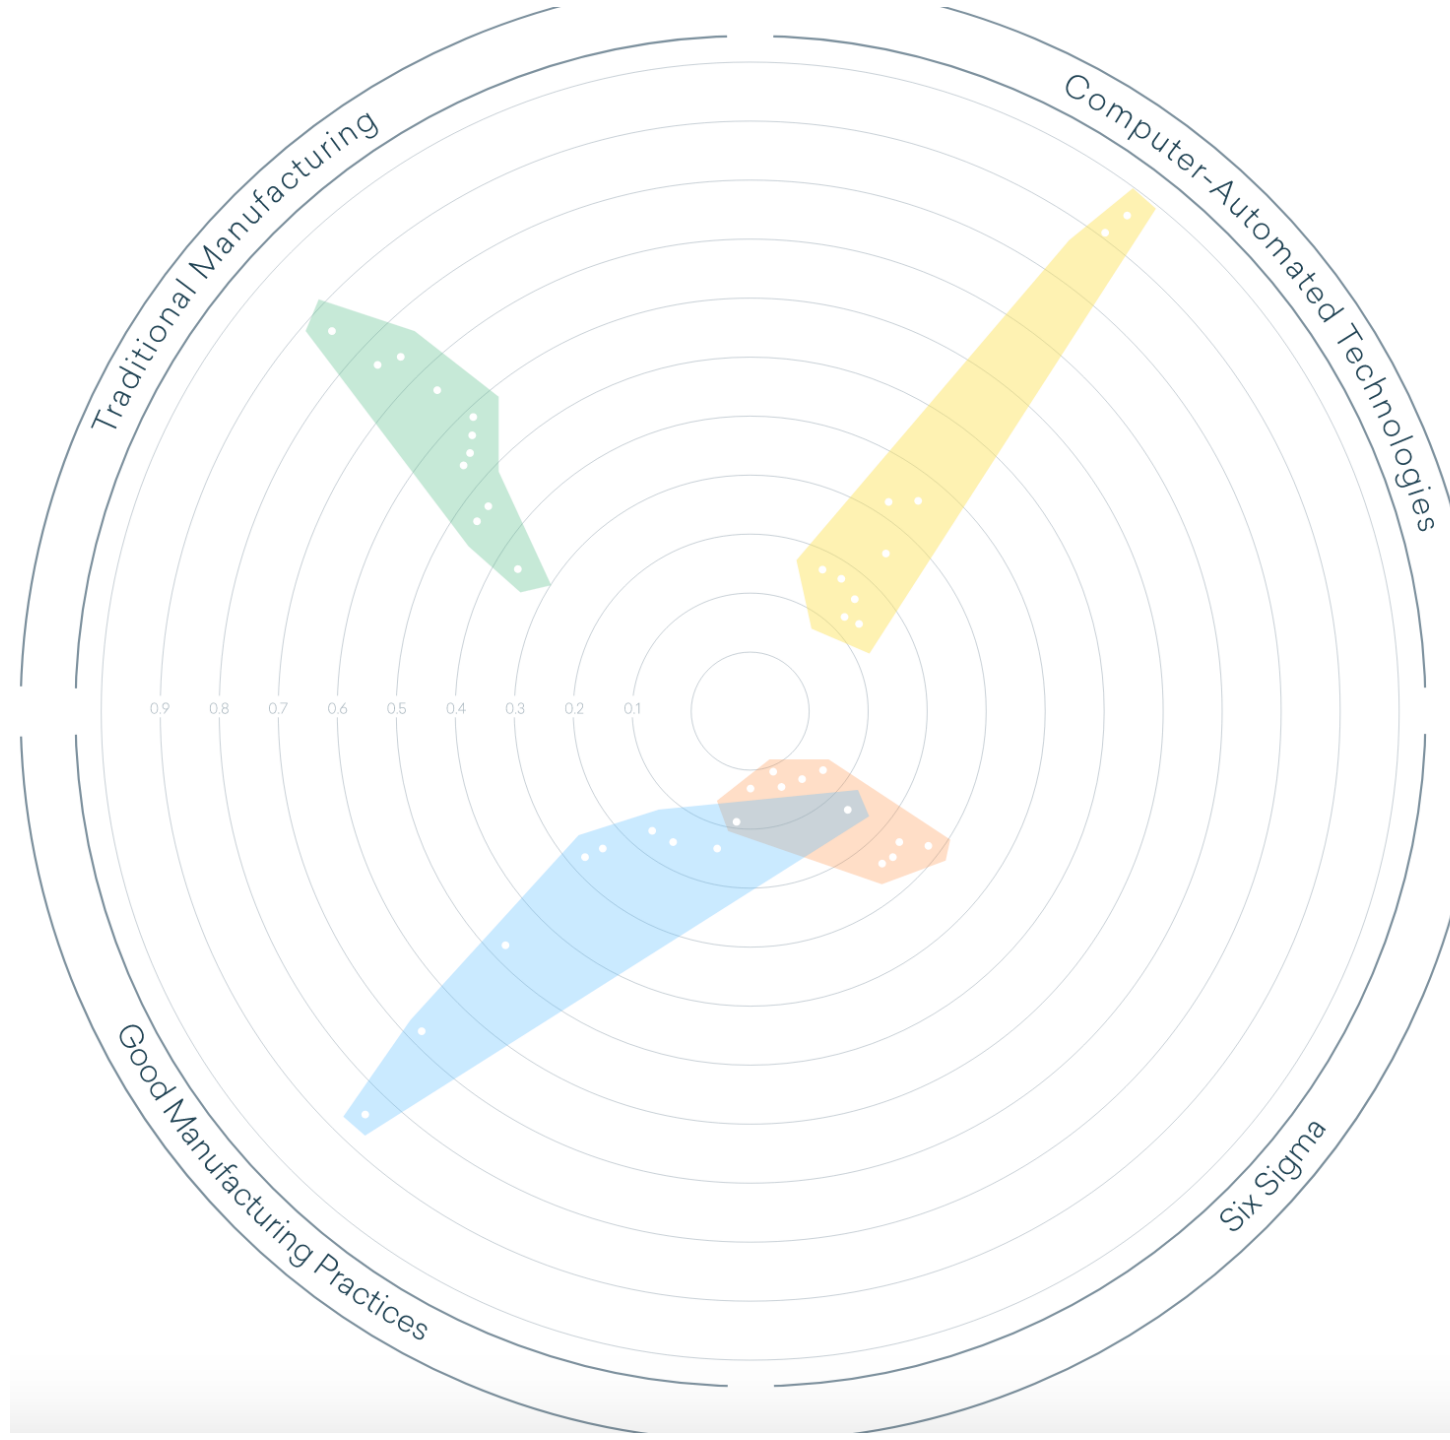

- Tech that aids production

- **Six Sigma (or Lean)**

- Process improvement

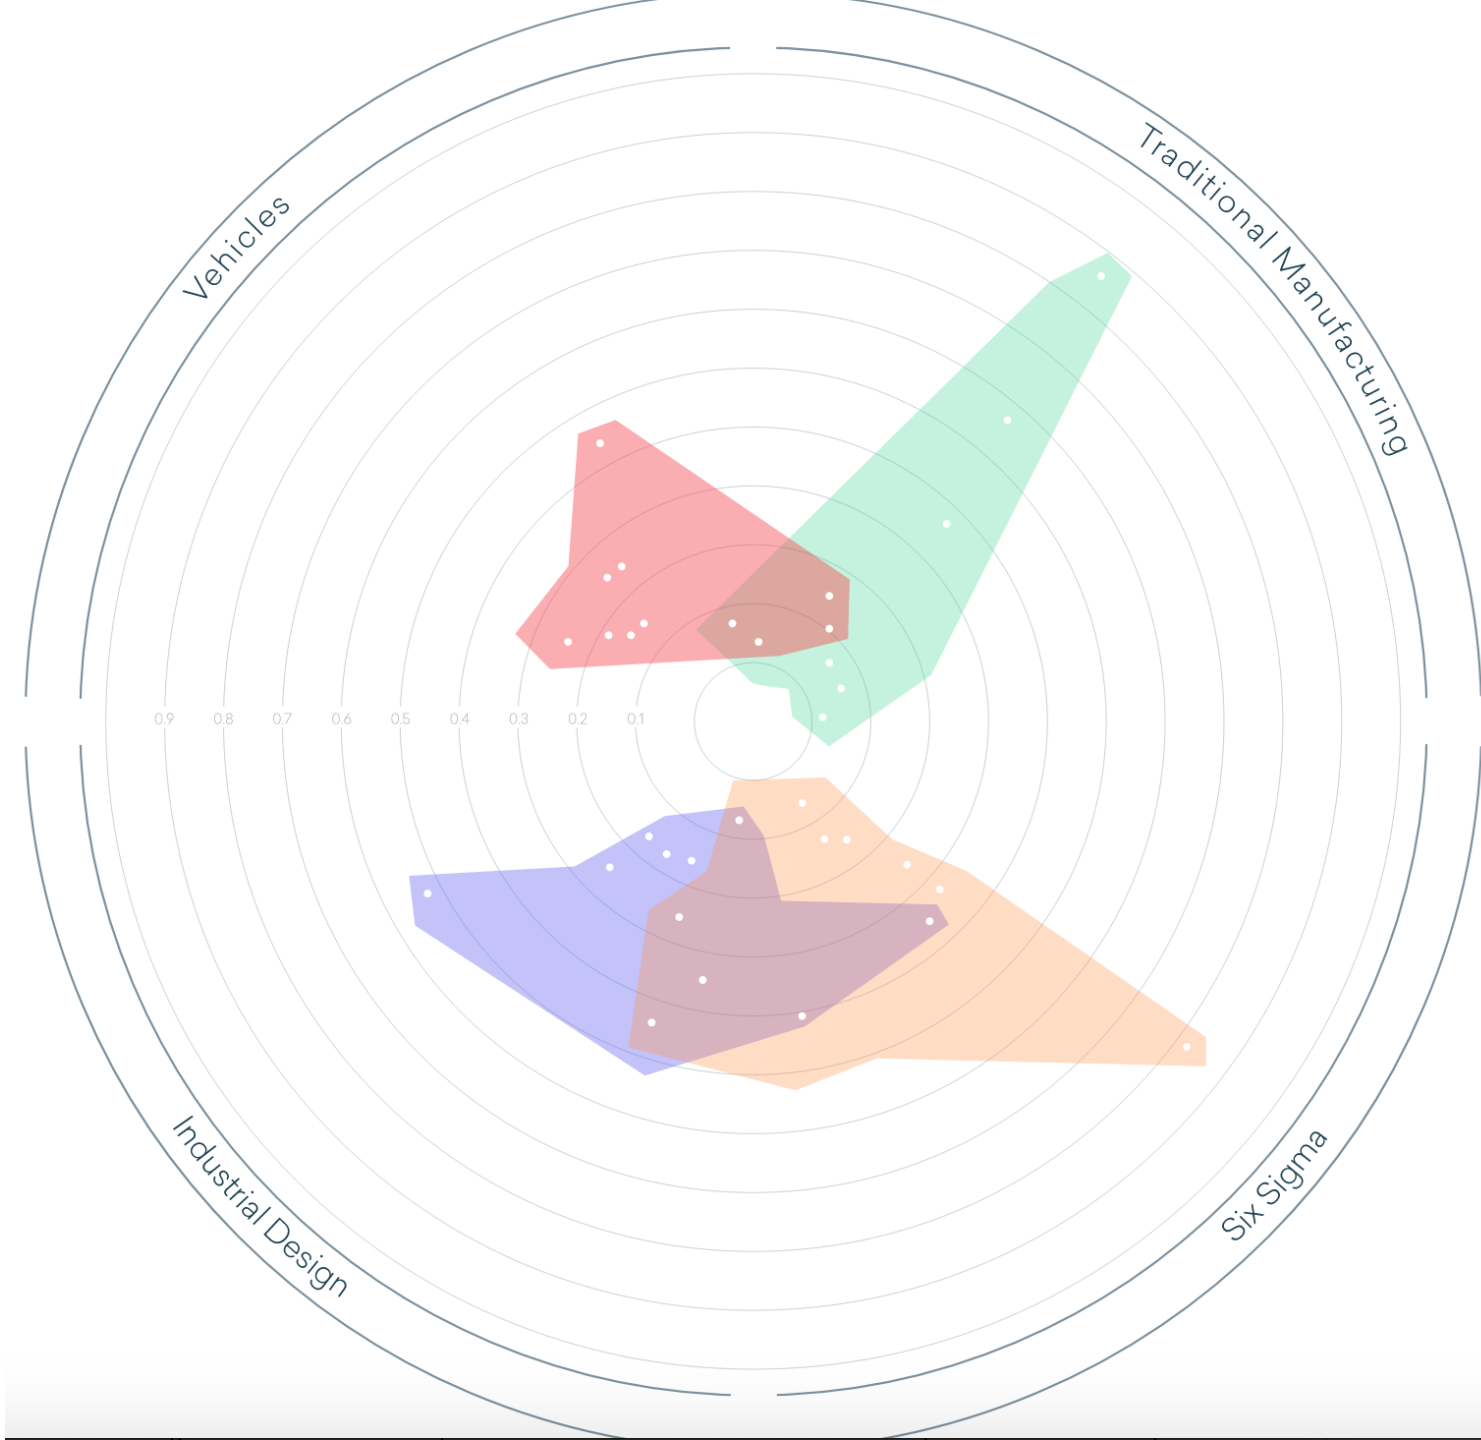

- **Good Manufacturing Practices (GMP)**

- Quality control

Michigan

- Vehicles and Industrial Design
- Two classic production sets
- Two engineering-oriented sets
- Traditional and vehicles overlap
- Industrial design and Six Sigma overlap

California

- Vehicles is the dominant cluster
- Other three – industrial design, Six Sigma, and GMP are engineering oriented
- Corrective and preventative actions (CAPA) shows up in three lanes

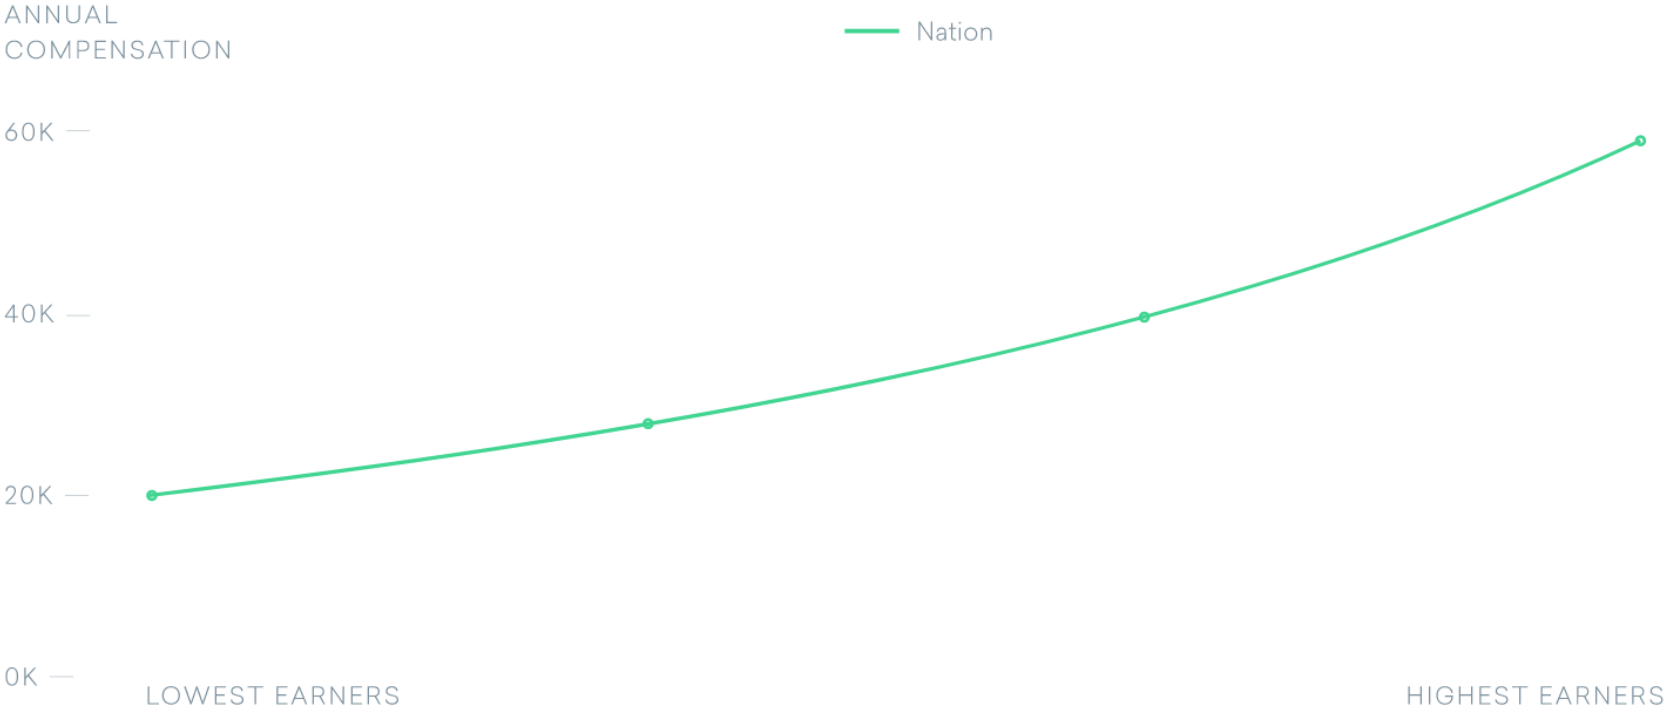

Skills Summary

- Employers look for blend of classic production skills and engineering-oriented skills
- Emerging skill sets – hybrids or fusions of two different areas
- Balance between on-the-ground know-how and process improvement/quality control
- High-tech

Compensation – Production Workers

FIGURE 32. ANNUAL COMPENSATION FOR PRODUCTION OCCUPATIONS IN THE UNITED STATES, 2016

Compensation by Skill

TABLE 3. THE EFFECT OF UPSKILLING ON MANUFACTURING SALARIES
COMPENSATION BY SKILLS FOR THE SIX CLUSTERS ANALYZED

Vehicles

WEIGHTED AVERAGE

\$48,585

Traditional Manufacturing

WEIGHTED AVERAGE

\$56,541

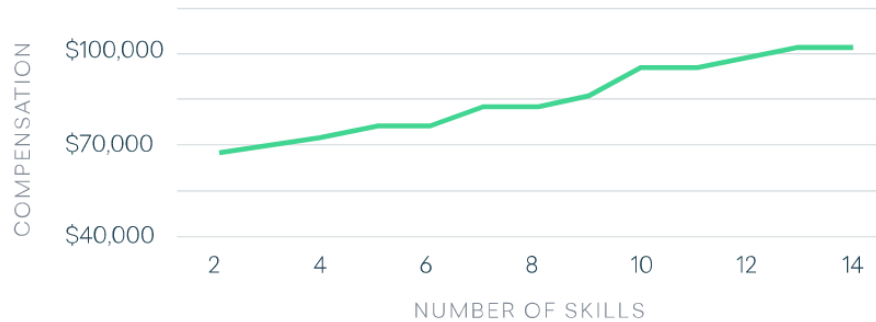

Computer-Automated Technologies

WEIGHTED AVERAGE

\$63,787

Compensation by Skill

Good Manufacturing Practices

WEIGHTED AVERAGE

\$74,613

Industrial Design

WEIGHTED AVERAGE

\$74,978

Six Sigma

WEIGHTED AVERAGE

\$79,093

	SKILL CLUSTER	MOST COMMON JOB TITLES LISTED BY EMPLOYERS	TYPICAL EDUCATION LEVEL
	Traditional	Welders, Machine Operators	High School Diploma
	Vehicles	Maintenance Mechanics, Manufacturing Maintenance Technicians	High School Diploma
	Computer-Automated Technologies	CNC Machinists, CNC Programmers	High School Diploma
	Good Manufacturing Process	QA Engineers, QA Managers	Bachelor's Degree
	Industrial Design	Design Engineers, Mechanical Engineers	Bachelor's Degree
	Six Sigma/Lean Processes	Manufacturing Engineers, Production Supervisors*	Bachelor's Degree *High School Diploma

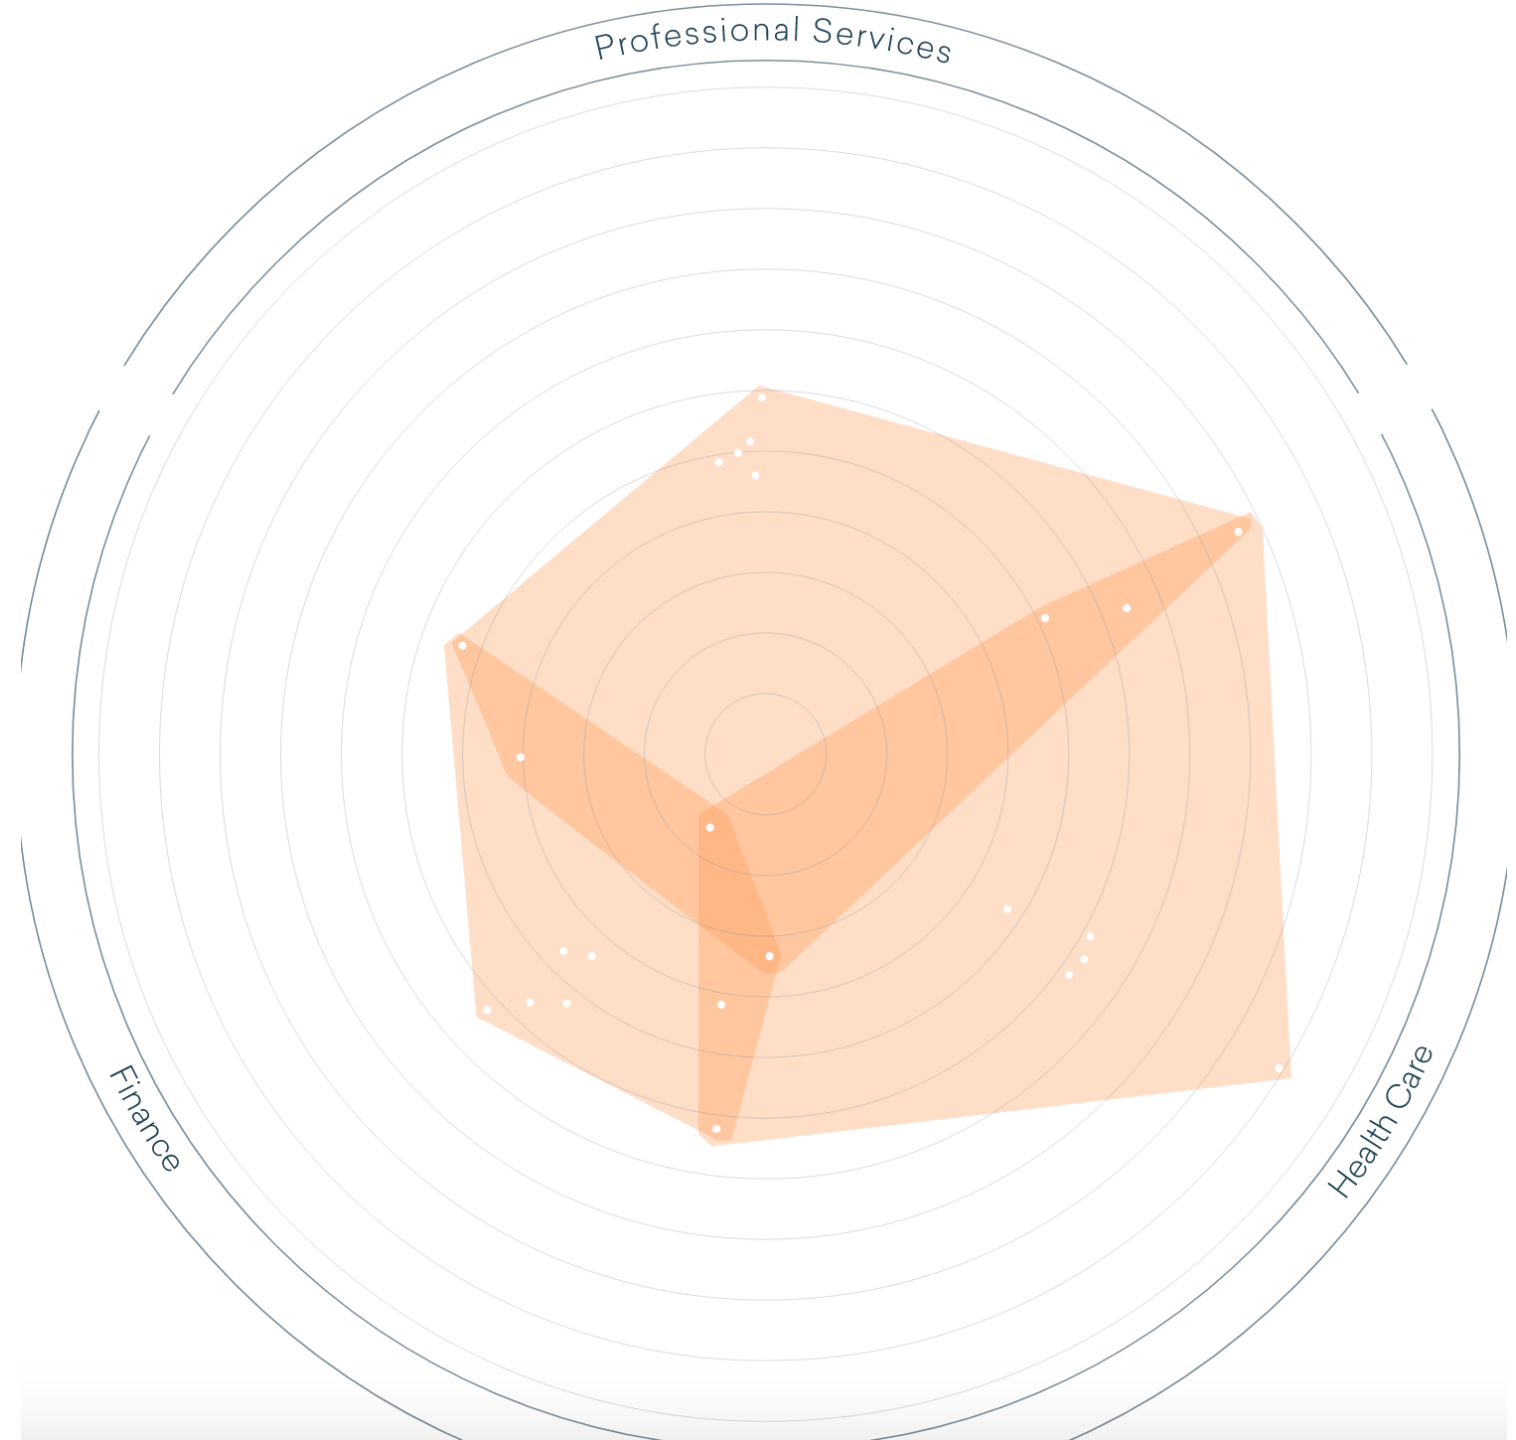

Pathways

- Production workers gain engineering skills
- Employers are investing in education/training
- Engineering skills open door to the business side of the house
- Other industries use these skill sets too

Six Sigma

Concluding Thoughts

- **Combine data with on-the-ground intel**
 - Use data to assess needs
 - Combine data with employer conversations
 - Develop an action plan
- **Double down on partnerships**
 - Promote workforce development and education programs that focus on the modern manufacturing skills specific to your region
 - Partner to develop a stronger education pipeline

Concluding Thoughts

- **Find new or better ways to support local manufacturers**
 - Understand local employer skills gaps
 - Provide insight using the research presented today
 - Discuss internship, apprenticeship, and training opportunities to grow a steadier pipeline
 - Discuss wage and job description opportunities
