Orlando Poised To Become Capital Of Autonomous Vehicle Research

By Michael Keller

Autonomous vehicles represent the future of transportation. When they replace human drivers, the world will see far fewer accidents, less traffic congestion, lower emissions and other huge benefits.

Orlando is rising as a mobility and transportation hub for the future

Written by Tim Giuliani 9th January 2019

As the "Theme Park Capital of the World," Orlando has earned a global reputation for bringing futuristic innovation to life. Not only does Orlando's status as one of the top travel destinations in the world fuel our tourism industry, but it also supports our robust network of technology specialists, engineers, software designers and more who power Orlando's theme park experiences. With the talent needed to innovate already in place, Orlando officials and local partners are leveraging the region's theme park expertise to bring a new kind of future technology to life – autonomous vehicles.
