LONG-STANTON MANUFACTURING

"WE'VE BEEN MAKING MONEY FOR OUR CUSTOMERS SINCE 1862"

Our Beginning

The Long-Stanton Manufacturing Co., Inc. traces its beginning to a young man who recognized an opportunity to use his trade by providing local businesses and their customers with a viable means of purchase. In 1862, John Stanton used his experience as a metal engraver to create a business by stamping metal coins to be used as "money." By 1865, his business was a leading producer of Civil War-era currency.

Before America had a uniform currency, each city had its own "Money," or "War Tokens," which were made of copper and distributed through the city. During the Civil War, John Stanton took his idea of producing these "War Tokens," which were used to purchase goods, to what is today Long-Stanton Manufacturing. In response to the need for a uniform currency, these coins were used as business cards for his Cincinnati clients. In response to the need for a uniform merchant had their company's logo stamped on the reverse side of their coin.

From 1862 to 1865, John Stanton supplied a variety of Cincinnati companies with these "War Tokens." His concept of local currency was well received beyond the Cincinnati area. He manufactured coins for over 1,000 firms in Detroit alone, and for a number of companies in Cleveland and other parts of Ohio. One merchant in Cincinnati ordered over 1,000,000 coins from Stanton during this three-year period. At a penny a piece, this represents more than \$10,000 in the

- ★ Long-Stanton was founded in 1862 by John Stanton.
- ★ Some of his first metal stamping jobs were to manufacture local currency and uniform buttons for the North and South during the Civil War.

2009 Family Business of The Decade Award by The Goering Center at The University of Cincinnati
